NATIONALITY

Dutch

BACKGROUND

After many years of crafting physical spaces as an architect, I've shifted gears into front-end development. Armed with a Masters degree in Architecture, Urbanism and Building Sciences, I've also worked on mastering React, JavaScript, and responsive design. I bring a unique blend of architectural precision and creativity to coding, ready to build digital experiences with the same mastery forged over years of shaping physical structures.

TECHNOLOGIES & TOOLS

React.js
JavaScript
Responsive Development
Web Development
API Integration
HTML+CSS
VSCode
Bootstrap
GitHub
Adobe Creative Suite
Figma

LANGUAGES

English (professional proficiency)
